

Minutes of the Palomar Mountain Planning Organization Annual Meeting

Saturday, May 27, 1995 at the Palomar Mountain Fire Station

Board Members Present: Terri Bailey, Thomas Burton, Robert Carlyle, Halcie Clark, Russ Day, Elizabeth Getzoff (alternate), Bruce Graves, John Moriarity, Michael Pique, John Tainer, Robert Thicksten.

The annual public PMPO meeting was convened at 2:10 P.M. Saturday May 27, 1995.

Announcements: Carol Ravenscroft announced a pancake breakfast, poetry reading, and bake sale to be held at the firehouse at 9 A.M. Saturday June 10th, to raise funds for science labs, field trips and the yearbook for the kindergarten through 8th grade school.

Secretary's Report: The minutes from the 1994 annual meeting were approved.

Treasurer's Report: The fundraising letter from the Palomar Mutual Water Company brought in sizable donations for the PMPO. The balance reported in the PMPO spring 1995 annual newsletter is \$6853. The treasurer's report was approved.

Palomar Observatory: Bob Thicksten reported on the construction and installation of the new telescope, which will work by infra-red interferometry. The telescope will consist of three mirrors, separated from each other by more than 100 feet. This telescope will be capable of seeing planets around nearby stars.

U.S. Forest Service: Norm Noyes reported that the new district ranger Jack Banlear had started in the middle of last summer. Prescribed burns covering 500-2000 acres/year are ongoing, as the fire load on the forest floor is the greatest in 15-20 years. Improvements have been made to the facilities at the Crestline campground, the San Luis Rey Picnic area, the picnic area in Julian, and the Indian Flats campground. The Forest Service is in the process of reviewing range allotment permits in light of environmental regulations. Ranger Milt Williamson will be contacting local residents regarding fire safety around houses in the upcoming fire season.

Palomar Mountain Volunteer Fire Department (PMVFD): The Fire Chief reported the PMVFD expects to finish the floor of the new fire station before the Labor Day Barbecue. The PMVFD elections will be held at the barbecue: new board members are needed and the presidency is up for election. Currently there are 10 volunteer firemen, rather than the standing number of 13.

Cedar Creek Water Project: Elizabeth Getzoff reported on the status of the proposed commercial well development by Mr. Yale to sell water accumulated by the entire Jeff Valley watershed. The 48-hour pump test on the well showed direct impacts on both Cedar Creek and on neighboring wells. Mr. Yale has filed a pre-intake assistance application with the County. As he plans to apply for a Major Use Permit, but has not yet done so, no studies on the environmental and biological consequences of the proposed pumping have been done yet. John Tainer emphasized the distinction between spring water, which has a self-limiting flow, and pumped well water, which does not. Consultant Jerry McLees of Brian Mooney Associates reported on multiple concerns regarding this project, including groundwater limitations presented by hydrologist Professor David Huntley, damaging biological effects, tree cutting, precedent-setting use of water beyond the share appropriate for the size of the parcel, and limitations to neighboring property owners to realize the full potential of their land.

Antennas on Crestline: Jerry McLees reported on the major use permit modification requested by the Relay Engineering Company to increase the height of their 35-foot existing antenna by 100 feet. This antenna is located outside of the antenna farm zoning area. Don Ramer represented Relay Engineering. A lengthy discussion on the antenna tower ensued, with the participants predominantly in opposition to the proposed height increase. Topics included the visual impacts of the new tower, interference with amateur radio operations, regulations and risks regarding

Minutes of the Palomar Mountain Planning Organization Annual Meeting

falling of antenna towers, technical and economic limitations of different means of expansion, and the process initiated by the PMPO by which the current zoning regulations were achieved by past discussions involving antenna providers, Palomar residents and the County Department of Planning and Land Use.

Election of PMPO Board Members: Russ Day announced that there are five open seats on the PMPO Board. The three incumbents running for re-election, Tom Burton, Russ Day, and Bruce Graves gave short statements concerning their past roles in the PMPO. Nominations were made from the floor for Carol Ravenscroft, who accepted, and Cliff Ellerby, who declined. Susan Humason volunteered to run also. After statements by these nominees, the motion to elect current board members Tom Burton, Russ Day, and Bruce Graves, and new nominees Carol Ravenscroft and Susan Humason was accepted by acclamation.

The meeting was adjourned at 3:20 P.M.

Respectfully submitted,

Elizabeth D. Getzoff, Secretary

Minutes approved by PMPO Membership May 25, 1996.
